Subject: Autonomous Systems and Robotics Graduate Engineer Application

Dear Sir/Madam

I would be a great addition to your team/cohort as, Along with having all the key skills required like Pytorch and ROS2 my 3+ years of professional experience specifically in robotics made me a great problem solver as you know not everything in robotics is readily available and we have to develop something new every time. This also lead me to be great at collaborating with other teams (mechanical and electrical) for achieving a common goal. In situations like these i am not only able to communicate my thoughts and ideas clearly but also do it with a self-start initiative so that the project is completed as efficiently as possible.

I hope you consider me for this position and thank you for reading through.

Sincerely

Mohan Konugolu
